FLAG TOTEM PRICES

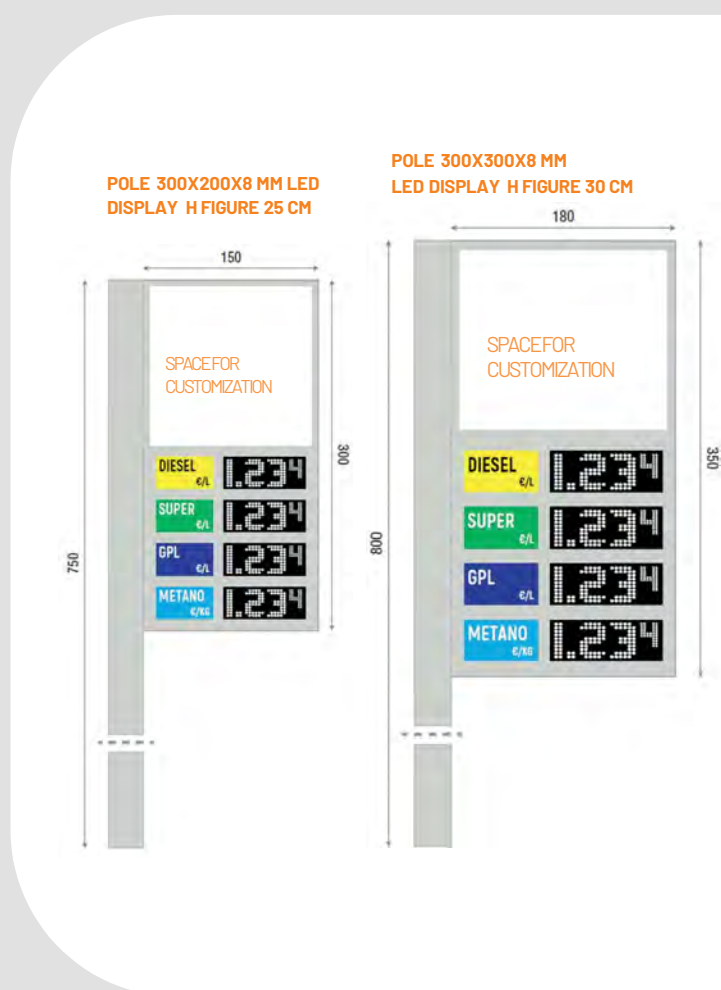

COMPLETE FLAG TOTEM WITH PRICES

FEATURES

The prices to be displayed are managed directly through the StoreSmart System, thus allowing fast, flexible and above all completely automated management. Thanks to this fully integrated management, it is therefore possible to send the Product Prices from the StoreSmart system directly to the TOTEM and it can also be done numerous times a day without any problems. In case of centralized remote management, it is possible to manage Product Prices directly from the OfficeSmart System installed in the Company's Offices. The prices sent by the HQ to the service stations of its network can be the same for all service stations or can be "customized" for each service station, ensuring flexibility and unique management.

The TOTEM POLE FLAG is composed as follows:

- Pole 300x200x8 mm.
- Angular profile in sheet metal.
- Opal methacrylate panel with logo in cut-out films.
- Lighting with led lamps.
- White or silver pre-painted aluminum composite panels.
- Price change management with remote controller
- Price change management through the Site Management

The TOTEM POLE FLAG is a Flag Pole (to be placed on the street side of the service station) complete with intelligent price displays for displaying prices to users. The TOTEM in question to be installed on the ground allows you to have a perfect solution to view the fuel prices applied at the Point of Sale.

ADDED VALUE

- The great advantage of the price list inserted in the totem is that they are intelligent devices integrated into the Maser automation architecture of the Yard Management.
- The prices to be displayed are managed directly through the StoreSmart System thus allowing a fast, flexible and above all completely automated management.
- Thanks to this fully integrated management, it is possible to send prices from the StoreSmart system directly to the price list inserted in the totem and it can also be done numerous times a day without any problems.
- In case of centralized remote management, it is possible to manage prices directly from the OfficeSmart system installed in the Company's offices.
- The prices sent by the HQ to the service stations of its network can be the same for all the stations of service or they can be "customized" for each service station, guaranteeing flexibility and management that is unique of its kind.

Here the TOTEM becomes completely "intelligent" and is managed in a totally interactive way. In fact, the great advantage of the TOTEM configured in this way is that it is an intelligent device integrated into the Maser automation architecture of the Management.
